**On the opening day of the Farnborough Airshow 2016 Thales announces that easyJet has selected the Thales/ACSS T<sup>3</sup>CAS - Terrain Collision Avoidance System - surveillance solution on their A320 NEO and CEO aircraft.**

easyJet, Europe's leading airline, has 130 A320 NEO and 6 Airbus A320 CEO on order, and will equip these aircraft with the T<sup>3</sup>CAS integrated surveillance solution. Due to its considerable weight and space saving as well as its low power consumption the T<sup>3</sup>CAS has a true competitive advantage for fuel consumption cost savings.

With T3CAS, easyJet will benefit from the system's unique performance based Terrain Avoidance Warning System, an all-in-one surveillance platform that includes collision avoidance, terrain avoidance and transponder.

Compliant to all upcoming worldwide mandates including ADS-B

### > Key Points

- easyJet will equip a total of 136 A320 NEO and CEOs with the T3CAS surveillance platform
- With reduced weight and lower power consumption the T3CAS brings significant fuel consumption and cost savings to Europe's leading airline.

OUT and IN as well as Runway Overrun Protection, T<sup>3</sup>CAS is the Airbus standard choice for Surveillance on all A320 family aircraft.

### > Notes to editors

The latest generation T<sup>3</sup>CAS equipped on the easyJet fleet includes an internal DO-260B transponder that is capable of providing a higher resolution in ADS-B data as well as supporting the Airbus runway safety system – Runway Overrun Protection System (ROPS).

### > About Thales

Thales is a global technology leader for the Aerospace, Transport, Defence and Security markets. With 62,000 employees in 56 countries, Thales reported sales of €14 billion in 2015. With over 22,000 engineers and researchers, Thales has a unique capability to design and deploy equipment, systems and services to meet the most complex security requirements. Its exceptional international footprint allows it to work closely with its customers all over the world.

*“The confidence placed by easyJet in our T<sup>3</sup>CAS surveillance solutions is all the more important to us that it reiterates our solution leading position on this global market with about 47% of Airbus linefit selections.”*

**Daniel Malka**, Thales VP and General Manager for Avionics Services Worldwide
