Papua New Guinea's National Airports Corporation closer to 2030 'smart airports' goal with Rockwell Collins contract renewal

- *NAC efforts focused on Port Moresby Jacksons International Airport*
- *Enhanced technology prepares the airport for travel surge during 2018 APEC Summit*
- *Data analytics to serve as the driver to optimize business operations*

SINGAPORE (Feb. 7, 2018) - By 2030, the National Airports Corporation (NAC) of Papua New Guinea will operate 15 smart airports to accommodate the evolving security requirements and new International Air Transport Association (IATA) initiatives. To achieve this goal, NAC has renewed its contract with Rockwell Collins' ARINC Airport Solutions for its Port Moresby Jacksons International Airport (POM).

Managing Director and Chief Executive Officer of the NAC Richard Yopo said, "Our work with Rockwell Collins dates back five years. Their proven expertise and depth of experience working with airports of all sizes across Asia was a key factor in our selection decision. We are confident that with the deployment of these solutions, we will be able to improve the passenger experience, streamline the passenger reconciliation processes and strengthen security at the airport. Most importantly, it enables us to provide a consistent model for passenger processing for all airlines that operate at POM Airport."

Included under the contract, Rockwell Collins' ARINC vMUSE™, AirVue™, AirDB™, AirPlan and Veripax™ will provide:

- Passenger processing capabilities that enable the NAC to focus on a singular suite of check-in applications
- Flight information display systems
- Operational database
- Optimization of passenger flow at security checkpoints by complementing existing manual processes by enabling the verification of flight and boarding pass information

In addition to the renewal, Rockwell Collins will provide NAC with a local departure control system and baggage reconciliation solution.

"The latest version of vMUSE will optimize business operations by providing the NAC with data analytics to monitor what's working and what needs further attention," said Yun Chong, global head of sales, Airport Systems for Rockwell Collins. "We are honored to be a part of NAC's smart airports mission and value our collaborative relationship in customizing a solution for POM."

The NAC owns and operates 22 national airports in Papua New Guinea. POM is the country's main airport.

About Rockwell Collins

Rockwell Collins (NYSE: COL) is a leader in aviation and high-integrity solutions for commercial and military customers around the world. Every day we help pilots safely and reliably navigate to the far corners of the earth; keep warfighters aware and informed in battle; deliver millions of messages for airlines and airports; and help passengers stay connected and comfortable throughout their journey. As experts in flight deck avionics, cabin electronics, cabin interiors, information management, mission communications, and simulation and training, we offer a comprehensive portfolio of products and services that can transform our customers' futures.
