

Rockwell Collins at CANSEC 2018: Showcasing made-in-Canada offerings to solve the Canadian Armed Forces' most complex challenges

Rockwell Collins will unveil a new tactical combat targeting solution at CANSEC 2018, as well as showcase its comprehensive portfolio of product offerings that meet the needs of its growing customer base in Canada. [Click to enlarge](#)

OTTAWA, Ontario (May 23, 2018) – Next week, Rockwell Collins will offer industry and government partners the opportunity to discover and interact with the latest, integrated avionics, communications and training solutions at CANSEC 2018, on May 30-31. The company will also unveil a new tactical combat targeting solution, designed to simplify complex tasks for the user so they can carry out missions while remaining agile.

“Rockwell Collins has demonstrated its commitment to provide more products and readily-available services for both commercial and military customers in Canada and we’re continuing to step that up,” said Lee Obst, managing director, Rockwell Collins Canada. “We look forward to excellent discussions at CANSEC with customers and industry partners on the new and improved capabilities we can offer to the region.”

EXHIBIT HIGHLIGHTS:

At the company’s exhibit at booth 1103, experts from Rockwell Collins will be available to discuss and demonstrate key offerings for virtual, mixed and augmented reality solutions, software-defined radios and networking solutions for all domains. These include:

- [Coalescence™ mixed reality system](#): Merging the trainee’s real-world view with a synthetic environment for a whole new way to effectively train in a seamless, enhanced mixed reality
- [Cockpit Display System for helicopter retrofits](#): Advanced cockpit solution that uses Helicopter Synthetic Vision System and Helicopter Terrain Awareness and Warning System to enable “seeing and avoiding” when vision is compromised
- [Pro Line Fusion®](#): An integrated avionics system to deliver the most advanced capabilities and situational awareness for fixed and rotary wing platforms
- [Communications solutions](#): Software-defined networked communications for air, land and sea tailored for operation in Canada
- [Test & Training Instrumentation](#): Flexible and secure military test range systems to integrate new technology into complex training scenarios

- **EP®-8100:** An image generation system with unprecedented realism and performance
- Interior solutions: A cargo freighter interior conversion kit for Bombardier Dash 8 Q300
- In collaboration with Leonardo DRS TLC, a Canadian Surface Combatant Integrated Communications System demonstrator can be found at booth 1511
