ST Engineering's Aerospace Arm Expands Component MRO Capability through Collaboration with Honeywell

Paris, 16 June 2019 – ST Engineering today announced that its Aerospace arm has entered into a long-term collaboration with Honeywell through an agreement that will have ST Engineering acting as a licensed repair centre for Honeywell components.

Under this agreement, ST Engineering becomes an official member of Honeywell Channel Partner network, and will have access to Honeywell's maintenance document and technical support for over 2,000 individual part numbers from avionics to electrical and mechanical components. As Honeywell's channel partner, ST Engineering will be using Honeywell's advanced technologies and software solutions to provide one-stop component repair and overhaul services for operators worldwide.

Mr Lim Serh Ghee, President of ST Engineering's Aerospace sector, said, "We are always building on our value proposition to enhance operators' fleet maintenance experience, and we see long-term collaboration with OEMs such as Honeywell as a way to achieve exactly that. Our expertise in MRO services and comprehensive engineering capabilities, together with Honeywell's parts and technical support, will help ensure reliable and quality services for operators looking for best-in-class component MRO support."

With over 40 years of experience in the aviation industry, ST Engineering's Aerospace arm provides comprehensive components repair and overhaul solutions that cover over 25,000 part numbers through a global network of distribution centres, satellite stores as well as in-house and external repair workshops. ST Engineering recently expanded its global reach by setting up its first component MRO facility in Vietnam through a joint venture with Vietnam Airlines to cater to the region's rising needs for component MRO services.

ST Engineering will be showcasing its MRO capabilities and other aerospace solutions at Paris Airshow 2019, Booth D210 Hall 5 and Chalet No. 60, from 17 – 23 June.

ST Engineering is a global technology, defence and engineering group specialising in the aerospace, electronics, land systems and marine sectors. The Group employs about 22,000 people across offices in Asia, the Americas, Europe and the Middle East, serving customers in the defence, government and commercial segments in more than 100 countries. With more than 500 smart city projects across 70 cities in its track record, the Group continues to help transform cities through its suite of Smart Mobility, Smart Security and Smart Environment solutions. Headquartered in Singapore, ST Engineering reported revenue of \$6.7b in FY2018 and it ranks among the largest companies listed on the Singapore Exchange. It is a component stock of the FTSE Straits Times Index, MSCI Singapore, SGX ESG Transparency Index and SGX ESG Leaders Index.

The Aerospace sector provides integrated aerospace services and solutions through a global network of facilities and affiliates in the Americas, Asia Pacific and Europe, supporting a broad customer base that comprises leading airlines, airfreight operators and armed forces. Its wide spectrum of maintenance and engineering solutions include airframe, engine and component maintenance, repair and overhaul; engineering design and technical services; as well as aviation materials and asset management services. The sector also has original equipment manufacturing capabilities and holds proprietary designs in products such as aircraft seats. For more information, please visit www.stengg.com.
